PROFESSIONAL SUMMARY

Full Stack Software Engineer with 4+ years of professional experience in enterprise application development, enhancement, and production support within the financial services domain. Hands-on experience with C#, .NET Core 8, ASP.NET Core Web APIs, Angular, TypeScript, JavaScript, and Microsoft SQL Server. Experienced in developing RESTful APIs, integrating real-time financial market data, and supporting business-critical FX applications involving streaming rates, quote management, and order booking. Strong foundation in object-oriented programming, SOLID principles, design patterns, microservices, asynchronous programming, and database optimization. Experienced in troubleshooting production issues, analyzing application logs, supporting releases and deployments, and collaborating with business and technology teams to improve application stability, performance, and service quality.

TECHNICAL SKILLS

- **Programming Languages:** C#, JavaScript, TypeScript, Java, SQL
- **Backend Technologies:** .NET, .NET Core 8, ASP.NET Core, Web API, RESTful Services, Microservices, Asynchronous Programming, Multithreading, Dependency Injection, LINQ, Entity Framework Core
- **Frontend Technologies:** Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, RxJS, Component-Based Architecture
- **Architecture and Design:** Object-Oriented Programming (OOP), SOLID Principles, Design Patterns, Clean Code, Separation of Concerns, Distributed Systems Fundamentals
- **Messaging and Integration:** Apache Kafka, WebSockets, FIX Protocol, Real-Time Data Streaming, Event-Driven Architecture, System Integration
- **Databases:** Microsoft SQL Server, T-SQL, Stored Procedures, Query Optimization, Indexing, Relational Database Design, NoSQL Concepts
- **DevOps and Deployment:** Git, Bitbucket, Docker, Kubernetes, Red Hat OpenShift, Helm, CI/CD Concepts, Linux Fundamentals
- **Production Support and Tools:** Application Monitoring, Log Analysis, Root Cause Analysis, Incident Troubleshooting, Post-Deployment Verification, Swagger, Postman, SSMS, Release Support

PROFESSIONAL EXPERIENCE

FinIQ Consulting India Pvt. Ltd. Pune, India
Software Engineer – Full Stack Apr 2023 – Present

- Develop, enhance, and maintain enterprise financial applications supporting foreign exchange (FX) products, including Spot, Forward, Swap, and FX Cash, with emphasis on reliability, data accuracy, and business continuity.
- Develop and maintain backend services and RESTful APIs using C# and .NET Core, implementing business logic, request validation, exception handling, and integration with downstream systems.
- Build and enhance Angular-based user interfaces using TypeScript, JavaScript, HTML, CSS, and RxJS, integrating frontend components with backend APIs and improving application functionality.
- Support real-time market data integration with external financial data providers through WebSocket and FIX-based connectivity, contributing to streaming rates and quote-processing workflows.
- Work with Microsoft SQL Server to develop and maintain stored procedures, investigate data-related issues, and optimize queries supporting financial application workflows.
- Troubleshoot production incidents through application log analysis, code-level investigation, database validation, and root cause analysis; coordinate fixes to minimize operational disruption.
- Participate in application releases, environment configuration checks, deployment activities, and post-deployment verification across development, testing, UAT, and production environments.
- Support application stability and operational effectiveness by investigating connectivity failures, configuration mismatches, service errors, and integration issues across dependent components.
- Contribute to application deployment and operational workflows involving containerized services and OpenShift/Kubernetes environments, where applicable.
- Collaborate with developers, QA engineers, infrastructure teams, and business stakeholders to analyze requirements, prioritize defects, deliver enhancements, and communicate technical issues in business-friendly language.
- Apply object-oriented programming, SOLID principles, reusable components, and appropriate design patterns to improve maintainability and reduce unnecessary coupling.
- Maintain technical documentation and support application operations in accordance with release procedures, change controls, and service expectations.

Larsen & Toubro (L&T) India
Graduate Engineer Trainee Aug 2021 – Mar 2022

- Supported software development activities involving application logic, web technologies, and relational database operations.

- Assisted with SQL query analysis, application troubleshooting, and defect investigation to improve correctness and reliability of internal workflows.
- Collaborated with team members on development tasks, technical problem-solving, and adherence to established implementation practices.

SELECTED PROJECT EXPERIENCE

Real-Time FX Market Data and Pricing Platform
C#, .NET Core, Angular, SQL Server, WebSockets, FIX

- Contributed to financial application workflows for real-time FX rate streaming, quote processing, and order booking, integrating backend services with market data connectivity components.
- Supported end-to-end data flow investigation across external connectivity, backend processing, database operations, and frontend rate presentation.
- Investigated production issues involving stale rates, connectivity interruptions, application errors, and configuration inconsistencies to help maintain service stability and data accuracy.

Enterprise Application Support and Release Management
.NET, REST APIs, Angular, SQL Server, Git, OpenShift

- Supported application enhancements, defect resolution, release execution, deployment verification, and operational troubleshooting for business-critical application services.
- Investigated environment-specific failures and configuration differences, coordinated with dependent teams, and verified application behavior following deployment and infrastructure changes.

EDUCATION

PG Diploma in Advanced Computing (PG-DAC) 2023
Sunbeam Institute, Pune

B.Tech in Computer Engineering / Information Technology 2017 – 2021
Walchand College of Engineering
